SunPower Maxeon 5 AC Module

SunPower Maxeon 5 Solar Panel

Enphase Microinverter

Enphase Enlighten™ Software

SUNPOWER | MAXEON 5 +

Fundamentally different. And better.

You want to live up to your potential. To put your energy into the things you care about. To be at your best—even on the tough days.

Why should your home solar be any different?

Only the Maxeon 5 AC Module combines Australia's most powerful home solar panels¹ with advanced microinverter technology from Enphase that maximises their individual potential. The result? 50% more energy than conventional solar systems over 25 years², and superior output in real-world conditions. Our system even wakes up earlier and stays on later than conventional home solar³, working as hard as you do.

View your performance online with the confidence of your 25 years of category-leading warranty protection⁴. And our 35 years of solar experience.

Finally. Home solar that works harder. And smarter.

Powering Positive Change™

SunPower solar technology is designed and manufactured by Maxeon Solar Technologies, a global leader in solar innovation.

- Operating in Australia since 2008
- **300,000** global customers
- Industry-leading R&D investment⁵
- **900+** solar patents⁶
- **11** solar performance world records since 2007⁷

What is a microinverter?

A microinverter is a small electronic device that sits beneath each solar panel. It's main task is to convert direct current (DC) electricity from your solar panels into alternating current (AC) electricity that you can use in your home or export to the grid.

Powerfully Simple.

Powerful panels mean you'll need fewer on your roof. In the case below, just fifteen Maxeon 5 panels equal the same system power of twenty conventional panels.⁸ This gives you a compact design, and space to easily expand your system if you electrify your car or home appliances. And with the microinverters elegantly hidden beneath each panel, you won't need bulky string inverters on your walls. Sometimes less is truly more.

String Inverter System

vs

Maxeon 5 AC Module System

In a conventional setup, one inverter controls the output of a whole solar array, a design with a single point of failure.

The Maxeon 5 AC Module distributes this risk across every panel through a far more reliable technology: Enphase microinverters, backed by a 25-year warranty.

Single point of failure

0% System Power

if 1 string inverter fails

Distributed architecture

80% System Power

if 1 microinverter fails

Maximise your savings, and minimise your headaches.

SunPower Maxeon 5 is the most powerful home solar panel in Australia, with the highest durability you can buy⁹ and an industry-leading warranty.¹⁰ When combined with Enphase microinverters, the system generates 50% more energy than conventional solar over 25 years.² It is, quite simply, the most advanced solar technology for your roof.

Better technology. Better together.

Make the most of every moment.

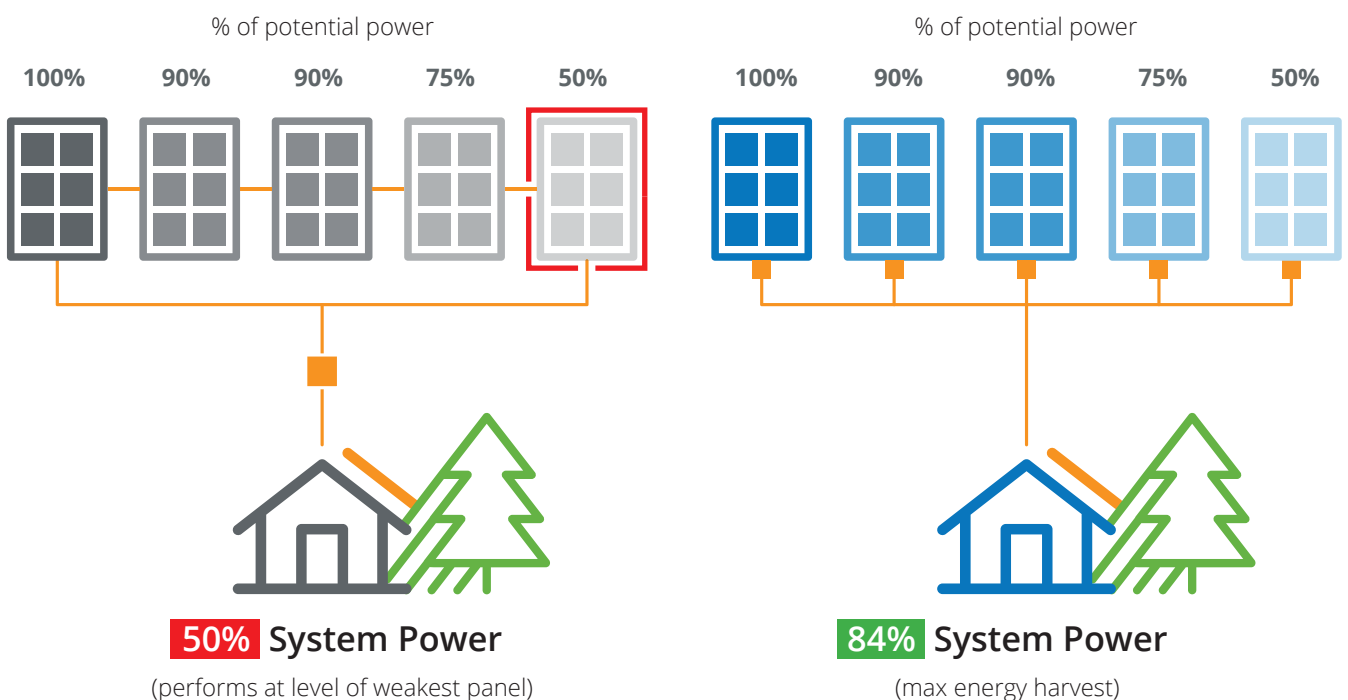

Each Maxeon 5 AC module functions independently, making your whole system more reliable, and your rooftop more productive. With conventional technology, the system performs only as well as its weakest panel. This can dramatically reduce output due to shade or other real-world challenges, even small debris like leaves.

String Inverter System

vs

Maxeon 5 AC Module System

Always in Sync

Australia's most advanced solar technology
—on your roof, and in the palm of your hand.

The Enphase Enlighten™ app

Panel-level monitoring*

Have confidence in your system performance through individual data on each panel.

Energy consumption data, financial savings data, and module level performance data may not be available to some customers.

Real-time views*

See your energy and environmental data on any connected device, and share your results on social media.  

*Data provided, on average, in 5-minute intervals.

Automatic software updates

Remain current on all utility rate updates and system improvements, hassle free.

Remote technical support

The Enphase Envoy™ communication gateway connects your solar array to the internet, facilitating live access to data on system performance and critical issues. The Envoy communication gateway sends out automatic alerts about technical issues to your installer and enables remote troubleshooting.

The Best of Both Worlds

Invest with confidence, knowing that the quality is proven for both SunPower Maxeon panels and Enphase microinverters. Each is uniquely designed for climate extremes, tested beyond industry standards, and proven by actual field results. Each is also backed by a category-leading warranty¹¹ from the manufacturer.¹²

SUNPOWER
FROM MAXEON SOLAR TECHNOLOGIES

- #1 durability⁹
- 0.005% panel return rate¹³
- 40-year expected useful life¹⁴
- 3.5 billion cells, 35 million panels shipped
- 25 years of product, power and service warranty coverage¹⁵

+

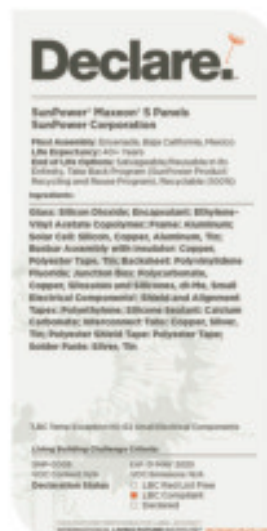

ENPHASE

- Tested for 1 million hours
- 0.05% microinverter return rate
- No moving parts or fans
- 28 million microinverters shipped
- Category-leading inverter warranty

The Leader in Solar Sustainability.¹⁶

We believe that solar panels should be as clean as the energy they produce. SunPower Maxeon panels helped pioneer new standards for solar industry transparency, responsible material use and recycling programs.

Declare and Cradle to Cradle labels refer to Maxeon 5 DC panels.

Ready to go solar?

As a leading designer of the world's most advanced solar panels, we know quality when we see it. That's why we partner with the finest local sales and installation partners who will customise your solar system to optimize for sunshine, building materials and local regulations. Our partners are members of your community, and understand the best way to achieve your unique energy and environmental goals.
